Summary

Software engineer and 2nd-year Computer Engineering student at Dar es Salaam Institute of Technology (DIT). Hands-on experience building modern, scalable web applications with a strong foundation in React, Node.js, TypeScript, Go, Python, MongoDB, and PostgreSQL — focused on turning complex problems into elegant, production-ready systems.

Experience

Systems Administrator (Part-time), HAKAVOD COMPANY LIMITED – Dar es Salaam, Tanzania May 2026 – present

Building and scaling technology solutions including infrastructure setup, system maintenance, and ongoing technical operations.

- Scaled and maintained core company technology infrastructure
- Ensured reliable system uptime and performance across business operations

Remote Intern — Full Stack Developer, CodeAlpha – Remote Dec 2025 – Feb 2026

Remote internship building and maintaining full-stack web applications in a fast-paced, production-oriented environment.

- Developed 2+ full-stack applications from concept to production
- Collaborated with the design team to deliver seamless user experiences

Software Engineering Intern, Dar es Salaam Institute of Technology (DIT) – Dar es Salaam, Tanzania Aug 2025 – Nov 2025

Software internship applying industry practices and shipping a real-world product for community healthcare providers.

- Co-developed and launched a Dispensary Management System for small dispensaries
- Applied full-stack development skills to solve real operational challenges in healthcare

Digital Consultant — Freelancer, DavincsTech – Dar es Salaam, Tanzania Aug 2024 – present

Freelance digital consulting — helping businesses transition into the digital economy through modern technology solutions.

- Transformed 15+ businesses to digital life by mapping their details on Google Maps
- Improved SEO visibility and online presence for local companies
- Built custom digital solutions including Snippe payment systems and RAFIKI SMS notifications

Projects

Jenga Online Jan 2025 – present

Production e-commerce marketplace for construction materials in Tanzania — verified stores, escrow payments, and nationwide delivery.

- Next.js, TypeScript, MongoDB, Cloudinary, Snippe (M-Pesa escrow), Resend, RAFIKI SMS
- Swahili-first storefront with seller dashboards and automated order notifications

VeloRoute Proxy

Jan 2025 – present

High-performance reverse proxy and load balancer written in Go.

- Health checks, rate limiting, and traffic distribution across upstream services
- Deployed on Heroku with production-ready configuration

NEXA AI

Jan 2025 – present

Private AI brain for enterprise documents — RAG pipeline with anti-hallucination guardrails.

- PGVector embeddings, retrieval-augmented generation, and document ingestion

UniTranslate

Jan 2024 – present

Web and mobile language translation platform.

- Full-stack translation API with web client and mobile-friendly interface

Flex AI

Jan 2024 – June 2025

WhatsApp bot via Baileys Web Session — group control and plugin APIs. (Archived)

- WebSocket real-time messaging, external API plugins, and session management

Education

Dar es Salaam Institute of Technology, BEng in Computer Engineering – Dar es Salaam, Tanzania Sept 2024 – June 2028

- Modules covered (2nd year, to date): OOP, System Design and Analysis, Operating Systems, Digital Electronics, Microprocessor Architecture, Web Design, Data Communication and Networking, Computer Programming, Database Design and Analysis, Geographical Information Systems, Calculus, Engineering Drawing

freeCodeCamp, Certifications in Web Development – Online

Jan 2025 – present

- Responsive Web Design
- Relational Database Design

Pugu High School, Advanced Level in Physics, Chemistry, Mathematics (PCM) – Dar es Salaam, Tanzania

Jan 2022 – Nov 2024

Certifications

- Responsive Web Design — freeCodeCamp
- Relational Database Design — freeCodeCamp
- Intern — Full Stack Developer — CodeAlpha (Dec 2025 – Feb 2026)
- IBM Generative AI Engineering — IBM
- Form Six Certificate — Advanced Level PCM — Pugu High School (2022 – 2024)
